AACN Standards for Establishing and Sustaining Healthy Work Environments Skilled Communication

Nurses must be as proficient in communication skills as they are in clinical skills

Our lives begin to end the day we become silent about things that matter.

True Collaboration Nurses must be relentless in pursuing and fostering collaboration

Effective Decision Making Nurses must be valued and committed partners in making policy, directing and evaluating clinical care and leading organizational operations

Appropriate Staffing Staffing must ensure the effective match between patient needs and nurse

Meaningful Recognition Nurses must be recognized and must recognize others for the value each brings to the work of the organization

Nurses who experience burnout... • Higher number of sick days miss work due to injury. illness, depression

or fatigue • More likely to have workplace errors • More likely to be impatient and reactive to follow colleagues and patients and families • More likely to change jobs
