Ideal for beginners and ...

Introduction

A technician needs to connect multiple PCs in a home office to share files and printers. Which device should be used?

C Firewall: Firewalls are used for security purposes, such as filtering and monitoring network traffic, not for connecting devices.

D Access point: Access points are used to extend the wireless network coverage, not for connecting wired devices within the same network.

Correct Answer: A Router A router is a network device that separates broadcast domains. Routers operate at Layer 3 of the OSI model and can break up

An administrator needs to implement access control policies for inter-VLAN routing. Which type of switch should be used?

A Unmanaged: Unmanaged switches do not offer the advanced features required for implementing access control policies for inter-VLAN routing.

A company is installing new PoE security cameras. Which device supplies power through the Ethernet cable?

A technician needs to terminate CAT6 cable runs in a server room. Which component should be used?

Correct Answer: C Patch panel A patch panel should be used to terminate CAT6 cable runs in a server room. Patch panels provide a centralized location for connecting and organizing Ethernet cables, making it easier to manage and maintain the network.

A Hub: Hubs are simple devices that connect multiple devices in a network but are not used for terminating cable runs.

A network technician needs to capture and analyze traffic from the local LAN. Which network appliance allows this?

A IDS: Intrusion Detection Systems (IDS) are used to monitor network traffic for malicious activity, not for capturing and analyzing all traffic.

Which networking device uses IGMP snooping to optimize multicast traffic?

Which component allows connecting wired devices to a wireless network?

C Modem: Modems are used to connect a network to the internet, not for connecting wired devices to a wireless network.

A company needs to implement a network access policy for BYOD clients. Which component helps enforce this?

A Switch: Switches are used to connect devices within the same network, but they do not enforce network access

C Firewall: Firewalls are used for security purposes, such as filtering and monitoring network traffic, and are

not used for terminating fiber optic connections.

D Access point: Access points are used to extend the wireless network coverage and do not terminate fiber optic connections.

A home user needs wireless internet throughout their house. Which networking device provides this functionality?

C Router: Routers are used to connect different networks and route traffic between them. While some routers have built-in wireless access points, not all routers provide wireless functionality.

A company is migrating physical servers to a cloud environment. Which technology enables this?

Correct Answer: A SDN Software-Defined Networking (SDN) enables the migration of physical servers to a cloud environment. SDN allows for the virtualization and centralized management of network resources, making it easier to move servers and their associated applications to the cloud.

A technician needs to crimp CAT6 cable onto RJ45 connectors. Which tool is needed?

Correct Answer: B Punchdown tool A punch-down tool is needed to crimp CAT6 cable onto RJ45 connectors. The tool is used to insert the individual wires of the

A Loopback plug: A loopback plug is used for testing network connections and devices, not for crimping cables.

C Protocol analyzer: A protocol analyzer is used to capture and analyze network traffic, not for crimping cables.

D Cable tester: A cable tester is used to test the integrity and functionality of network cables, not for crimping cables.

Which device uses CSMA/CD to manage collisions?

C Switch: Switches are used to connect devices within the same network, but they do not use CSMA/CD to manage

D Firewall: Firewalls are used for security purposes, such as filtering and monitoring network traffic, not for managing

A network switch at a small office keeps losing power. Which standard should be implemented?

Correct Answer: B STP Spanning Tree Protocol (STP) should be implemented to prevent network issues caused by a switch losing power. STP is a network protocol that prevents loops and provides redundancy, ensuring that the network remains functional even if a switch loses power.
