Allow the patient to perform as much of the bath as possible. B. Ask the patient what he wants to do C Complete the entire bath for him to conserve his energy D. Encourage the patient to do the best he can to clean himself

A resident comes out of their room saying they have burned their leg after they dropped hot soup on it. The skin looks blistered and red. The nurse assistant knows this is A. Superficial burn B. Partial thickness burn. C Total thickness burn. D. Serious burn

A client who has not had a bowel movement in four days would receive the most benefit from which of the following procedures? A Endoscopy B. Colonoscopy C Catheterization

The client asks the nursing assistant to assist her to cut her toenails. The nursing assistant knows this client has type two diabetes Which of the following actions is best? A. Retrieve a safety clipper and hand it to the client B. Report to the nurse that the client needs her toenails trimmed C. Check the client's blood glucose before cutting her toenails D. Check the chart for physician orders regarding nail trimming

The nursing assistant takes the temperature of an elderly client and finds it to be 100.6 degrees F. The client reports having just taken a sip of hot tea. Which of the following actions is appropriate? A. The nursing assistant waits at least fifteen minutes before retaking the temperature B. The nursing assistant records the temperature in the chart. C The nursing assistant scolds the client for not letting her know beforehand. D. The nursing assistant takes an axillary temperature instead.

A nursing assistant takes the blood pressure of a client and finds it to be 82/43. The client reports feeling dizzy. The nursing assistant should A Take the client's pulse next. B. Report the finding to the nurse. C Record the vital sign in the chart D. Instruct the client to drink more fluids

Which of the following pulses will be most commonly used by a nursing assistant when acquiring vital signs? A. Popliteal

The nursing assistant is helping residents to eat in the dining room when suddenly, a resident stands from their seat and begins clutching their throat while coughing silently. The nursing assistant performs which of the following actions first? A. Ask the resident if they are choking

A client at the facility receives a new roommate. While the roommate is in the bathroom, the client leans toward the nurse and whispers, "Why is she here anyway? Is she sick?" The best response by the nursing assistant is: A. "I'm not sure. Let me take a look at her chart." B. "Why don't you ask her yourself C "She's here for the same thing as you" D. "I'm afraid I can't share that information with you.

A client with Alzheimer's wakes up more confused than usual one morning The nursing assistant knows that, after breakfast, it is most important to support normal gastrointestinal tract function by: A Recording intake and output. B. Brushing the client's teeth. C Taking the client to the bathroom D. Assisting the client to call family members.

Before shaving a resident, the nursing assistant checks for which of the following items in the resident's care plan? A. Shaving instructions related to problems or issues clotting B. History of a heart condition. C Presence of the resident's razor from home. D. Any previous refusal of ADL

One of the patients on the unit is on airborne precautions due to suspected tuberculosis. To rule out the disease, the doctor has ordered sputum specimens to be collected. What is the best daily time for the nursing assistant to collect the specimens? A. Before a meal.

The nursing assistant walks into a patient's room and discovers him masturbating Which of the following actions is correct? A. Scold the patient and tell him he should be ashamed of himself. B. Exit the room to provide privacy for the patient. C Report the activity to the nurse in charge D. Ask the patient why he is doing this to himself

The nursing assistant cares for a client who is extremely agitated. She yells, screams, and frequently tries to bite staff. The nursing assistant should A. Use restraints to ensure the client's safety B. Speak calmly in an

authoritative and neutral manner to the client. C. Use the television to distract the client. D. Provide care only when absolutely necessary

When helping a client with left sided weakness due to a CVA, the nursing assistant should position the client's cane A. In front of the client B. On the left side C On the right side D. Away from the client.

A nursing assistant enters a client's room and finds a fire burning in a trashcan. The nursing assistant's first action is to A. Call the nurse for help. B. Remove the patient C Try to put out the fire. D. Pull the fire alarm.

When a client constantly ignores the urge to void, the client is putting themselves in danger of what complication? A. Constipation B. Incontinence C Insomnia D. Poor appetite

A client with a Foley catheter is ordered to ambulate twice daily. Before ambulating the client, the nursing assistant should A keep the bag below the bladder level B raise the bag above the bladder level. C have the patient cover the bag with a pillow sleeve. D. ask the nurse to confirm this order.

The nursing assistant suspects that a resident in the facility is being abused due to multiple unexplained bruises, refusal to answer most questions, and refusal of ADLs. Which of the following actions should the nursing assistant take next? A. Notify the nurse assigned to care for the patient about the bruises. B. Report the suspected situation to the nursing assistant's immediate supervisor C. Ask the resident repeatedly to identify an abuser. D. Wait for more proof in order to identify the abuser.

Nursing assistants work in a lot of different places. One place that CNAs work is a skilled nursing facility. This type of facility is also called a A hospital B rehab center

Where should the wheelchair be placed when transferring a stroke patient from their bed to the chair? A. On the patient's weak side B. At the foot of the bed C At the head of the bed D. On the patient's strong side

A resident is ordered to be in High Fowler position for each meal. Which of the following descriptions is the most accurate depiction of High Fowler position? A. The patient lies on their stomach for twenty minutes prior to eating B. The patient's bed is at a 30 degree angle with the patient slightly slumped over to the left C The patient's bed is at a 60 degree angle with the feet propped up. D. The patient's bed is at a 90 degree angle and the patient is positioned sitting up.
